1)Patie	ent wit	h prolor	nged PT [.]	T, all th	ese facto	ors should	j elevate	d except:	
a-X									
b-XII									
c-VII									
d-V									
								Answe	r: C

2According to below picture, the most sensitive test for it(

a-Ultrasound
b- platelet count
с-рТТ
d-pT
Answer: A
: 3Most common causes of fatty change in the liver
a-Obesity
b-Diabetes
C-old age
Answer: B
4)A child is born with a single functional allele of a tumor suppressor
.gene
At the age of five the remaining normal allele is lost through a point
mutation. As a result, the ability to inhibit cell cycle progression until the
cell is ready to divide is lost. Which of the following neoplasms is most
likely to arise via this mechanism
a-Breast ductal carcinoma
b-Pulmonary small cell anaplastic carcinoma
c-Ocular retinoblastoma
d-Cerebral astrocytoma
Answer: C
المَرِي أَمْرِي المَوَيَسِّرْ لِي أَمْرِي

5) xeroderma pigmentosum are all except : a-Basal cell cancer b-Melanoma c-Sweat gland cancer

d-Basaliod squamous cell cancer

:Answers

Answer: B

Answer: a

6) One of the following is not hallmark of cancer: a-self-sufficiency in growth signals b-high-insensitivity to growth-inhibitory signals c-Evasion of immune surveillance d-sustained angiogenesis

7) One of the following associated with septic shock :

a-Hyperglycaemia b-Hypoglycemia c-Alkalimia d-Hypercalimia

8) According to picture the correct arrangement is

A- Hemostasis/inflammation/repair/remodelling B-Remodelling /repair/inflammation/hemostasis C-Inflammation / hemostasis/repair/ remodelling D-Hemostasis/inflammation/ repair/remodelling

في همّتك ما يبني أمّتك

Answer: A

9)the most common form of necrosis : a-coagulative necrosis b-caseous necrosis C-liquefactive necrosis

d- fat necrosis

Answer:A

Õ

10) Patient had a mycoplasma bacteria and you gave him streptokinase ,the drug works asa-Plasminogen activator

b-Plasminogen activator inhibitor

c-Fibrin

Answer: a

11) Child Patient with periorbital edema what the most important information you should take from history

a-Drug history b-Familial history c-Similar letion in the body d-Weight lose e-virus infection

:Answer

12) The most sensitive for determine the grade of cancer:

- a-Extent of cancer metastasis
- b-The lymph node
- C- The number of mitosis

:Answer

13) Which of the following is benign:

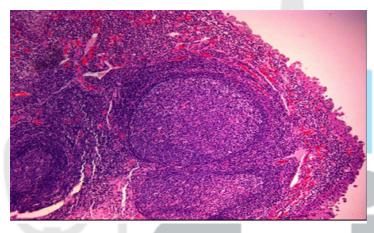

a-Chondroblastoma b-Osteochondroma c-Lewis tumor d-Melanoma

:Answer

اللّهم لیس بجدّی و اجتهادی و إنّما توفیقك و عونك یا معین

14) A 21 age female pregnancy patient, come to clinic with unilateral occlusion, what you don't do : a-Ultrasound b-Platelet count c-PT d-PTT e- D- dimer

15)According to below picture which is indicate

a-coagulative necrosis b-granulation tissue c-tertiary lymphoid organ

Answer: o

Answer:

Answer: B

16) obstruction of superficial lymphatics by breast cancer may cause edema of the overlying (skin) the characteristic finely pitted appearance of the skin of the affected breast is :

Answer: peau d'orange 17)The most common arteriolar embolization site of systemic embolization is: a-intestines. b-Kidneys

c-the lower extremities

d-central nervous system

e- Spleen

رْفَعِ اللَّهُ الَّذِينَ آمَنُوا مِنكُمْ وَالَّذِينَ أُوتُوا الْعِلْمَ دَرَجَاتٍ﴾

18) According to below picture, this is:

a-Liquefactive necrosis
b-Gangrenous necrosis
C- Caseous necrosis
d-Fat necrosis
e- Coagulative necrosis

19)vegetation occurs in : a-ASD b-valve c-VSD

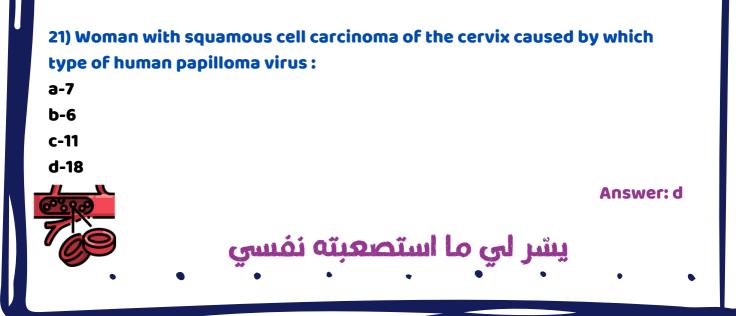

20) One of the following refer to paraneoplastic syndrome:

a-Cachexia, anemia and fatigue b-Signs and symptoms related to hormone production C-Location and impingement to adjacent structure

Answer: a

Answer: e

Answer: b

22)If there mutation in tumor suppressor gene, it will be distribution in the check point between: a- S & M2 b-S & G2 C- G1 & S d- G0 & G1 :Answer 23) phosphorylation of RB causes : a-Inhibition of the growth factor **b**-Promotion growth factor Answer: b 24) One of the following is true : Epithelial papilloma virus is benign tumor 25)most often encountered in foci of tuberculosis infection is : a-Coagulative necrosis **b-Liquefactive necrosis** C- Gangrenous necrosis d- Caseous necrosis e-Fat necrosis Answer: d

26) Patient had a congestive heart failure and with as the below picture , what is the most serious in his history that causes it :

طموحٌ ... لا تعرقله الصعاب

a-Diabetes b-hypertension c-Lipidima d-obesity

Answer:

27) Platelet derived from one of the following cell:

Megakaryocytes Wrong about macrophage (28 a-Short life 6 hours b-It's secret nitric oxide

Answer: a

Answer: b

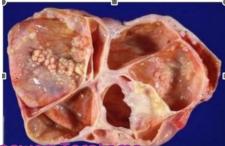

29) All the following are clinical manifestations to phospholipid antibody syndrome exept:

- a- recurrent thrombosis
- b-thrombocytosis
- c- Repeated miscarriage
- d- cardiac valve vegetation

30) Libman endocarditis accombaind with?

SLE

31) according to this picture which is tumor cells consists of three germ cell?

Answer: Teratoma

32) A patient presented to the ER with a venomous snake bite. Tests revealed he had multiple infarction and organ failure. Patient had cyanosis. Which one of the following organs won't be of a manifestation of the bite:

احلم .. اتمنی .. افعل

- a-Liver
- **b-Kidney**
- c-Spleen
- d-Eyes

Answer:

33)according to below picture , this is a:

a-red infraction b-white infraction c-fat emblosim

Answer: b

34)according to below picture which is unencapsulated tumor, this is:

a)invasive breast cancer b) fibroadenoma

Answer: a

35)patient had bypass surgery,during it he was suffering from chest pain,dyspnea, headache, and confusion ,what do you think the responsible of all of that ? a-Fat embolism b-Amniotic fluid embolism c-Pulmonary thromboembolism d-Air embolism

Answer: d

"يسمعُك وإن كان رجاؤك حبيس صدرك!

36) Fracture of long bone ...?

Fat embolism 37) all of the following bilateral edema except

Filariasis*

38)All of the following contribute to thrombosis by abnormal blood flow except : a-Ulcerated atherosclerotic plaques b-aortic aneurysm c-Hyperviscosity syndromes /polycythemia d-Sickle cell anemia c-Leukemia 39)Mesothelioma is an associated neoplasm which is caused by :

- a-Asbestosis b-silicosis c-Hepatitis d-Osteomyelitis

40) which is of the following is not autosomal dominant cancer syndrome
a-Li-Fraumeni syndrome
b-Neurofibromatosis
c-Mutiple endocrine neoplasia 2
d-Hereditary nonpolyposis syndrome
e-Xeroderma pigmentosum

Answer: e

Answer:a

41)identify the following picture:

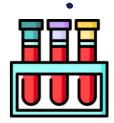

a-Chondroma b-Chordoma

Answer: a

"لو أبصرَ المؤمن ما خُفيَ من لُطف ربِّه؛ لاستلذَّ البلاء كما يستلذُّ العافية!"

42) One of these consdered benign tumour : Melanomachondroblastomachondrosarcoma-

43)The leading cause of below ovary's picture :

Answer: b

a-ovary mass b-Hemorrhage

44)the percentage of strength in well skin wounds that recover the normal skin by 3 months is : a- 10% b-40% c-100% d-80%

Answer: d

Answer:

45) man came to emergency,he had hypoxia and rapid breathing , you made pTT test and the result was prolonged pTT ,all of the following will be in high level except : a-D-dimer b-X c-VII d- Thrombin e-Fibrenogen

Answer:

واغفر لنا إن عاهدناك ألا نعود وعُدنا، اغفر لنا وردنا إليك ردًا جميلًا.

46)Xerderma pigmentosum doesn't affect: a-Melanoma **b-Squamous cell cancer** c-Sweat gland d-basal cell cancer d-Basaliod squamous cell cancer :Answer 47) All of the following are steps of angiogenesis in wound healing except: a-Endothelial migration **b**-Periendothelial recruitment c-Basement degradation d-Wound contraction e-Vasodilatation :Answer 48)which is the incorrect about septic shock : Decrease vascular permeability hypoperfusion 49) the intracellular material that accumulates in a variety of tissues with aging: a-Lipofuscin **b-Fatty change** c-Glyogen d-Melanin Answer:a 50) Bemard- soulier syndrome deficiency in : a-GPIb b-Gpllb-llla c-Von willebrand factor Answer:a 51)BRCA1 mutation leads to cancer in:

Beast and ovary cancer

إِنَّ المرءَ لن ينالَ ما يُحب، حتى يصبر على كثير مما يكره .

52) what is the most preventable cause of cancer? a-Alcohol consumption b-Tobacco smoke

53) The most sensitive for determine the grade of cancer :
a-Extent of cancer metastasis
b-The lymph node
c-The number of mitosis

:Answer

54) One of the following is true

e-Inflammation

Epithelial papilloma virus is benign tumor

55) A 33-year-Old previously healthy woman presented to her general practitioner with a 1-day history of worsening left swelling associated with pain and tightness. The patient denied a history of recent surgery or trauma. prolonged immobilization or smoking She denied any recent insect bites. Medications review revealed that she had started oral contraceptives 2 months previously. A Doppler sonogram shows thrombosis of deep left leg veins. Which or the following pathophysiologic mechanisms is most responsible for the edema and swelling in this patient? .a-Increased Hydrostatic Pressure b-Reduced Plasma Osmotic Pressure c-Lymphatic Obstruction d-Sodium and Water Retention

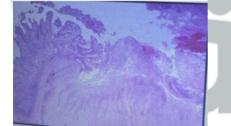

:Answer

"وسلوى المؤمن أنَّهُ مأجورٌ على كُلِّ آمٍ يئنُّ بها، وعزاؤهُ أنَّها دُنيا."

55) 57-year-old obese patient presented at the emergency department with 1 year history of a small lump in her breast: over the last 2 months the breast had become much bigger, heavy, itchy, and hot the patient's mother and 2 maternal aunts died of pre-menopausal breast cancer. Clinical exanimation of the left breast showed widespread erythema and intense edema with peau d'orange, along with an enormous and illdefined mass. Which of the following pathophysiologic mechanisms is most responsible for the edema and swelling in the patient's breast? :Select one

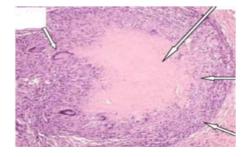

a-Increased Hydrostatic Pressure b-Reduced Plasma Osmotic Pressure .c-Lymphatic Obstruction d-Sodium and Water Retention e-Inflammation

56)Identify the below picture:

Answer: ulcer

57)the multinucleated cell in below picture:

a-lymphocytes b-Macrophage

Answer:b

Answer

فقد تُورِقُ الأغصانُ بعدَ ذبولِها، ويبدو ضياءُ البدر في ظلمةِ الوَهْن
