* schizophrenia has **no single cause**, How??

it could be arise from deferent things emotional, environmental, genetic and trauma

* schizophrenia has **no single treatment**, How??

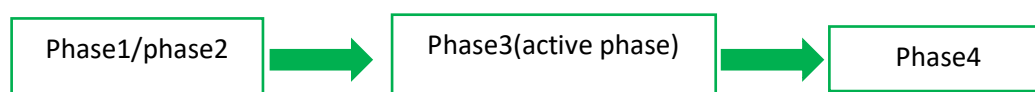

there are many treatment approach like

- ▶ 1. psychoPharmacology (antipsychotic drugs)
- ▶ 2. psychotherapy (indivisual, group, Photoes)

* male is more affected in schizophrenia than female

* female is more affected in mood disorders than male

* there are four phases

* **slide 13:** positive symptoms vs negative symptoms

* positive symptoms	negative symptoms
delusion, hallucinations, disorganized speech, Catatonic behavior	affective flattening (no emotions), a logia (كلامه قليل), avolition(ما عنده روح المبادرة)
<ul style="list-style-type: none"> اشي جديد اكتسبه ما كان موجود عنده من قبل 	<ul style="list-style-type: none"> كانت موجودة عنده و فقدها
positive response of medication (يستجيب للعلاج)	Negative response of medication (ما رح يتعالج مع الادوية)
