- 1) When does oogenesis start in females?
 - a) During Fetal life.***
 - b) After puberty.
 - c) After fertilization.
 - d) At birth.
 - e) In the cortex of ovary.

- 2) Which of the following form at birth?
 - A- Primordial Germ Cell.
 - B- Daughter oogonium.
 - C- Zygote.
 - D- Primary Oocyte.***
 - E- Mature Ovum.

- 3) What is the meaning of azoospermia? Select one
 - a) Absence of sperms***
 - b) Dead sperms.
 - c) Short sperms.
 - d) Lack of seminal fluid.
 - e) Large sperms.

- 4) Gametogenesis in male is formation of? Select one:
 - a) Spermatogonium.
 - b) Mature sperm.***
 - c) Spermatid.
 - d) Daughter Spermatogonium.
 - e) Secondary spermatocytes.

- 5) Oogenesis is formation of? Select one:
 - a) The first polar body.
 - b) Spermatid.
 - c) The second polar body.
 - d) Daughter oogonium.
 - e) Ovum.***

- 6) How many sperms at ejaculation? Select one:
 - a) About 200,000,000.***

- b) About 800,000.
- c) About 300,000.
- d) About 200,000.
- e) About 2,000,000.

7) All the followings are functions of Sertoli cells except? Select one:

- a) Phagocytosis of spermatogenesis.
- b) Epithelial Supporting cells.
- c) Source of nutrition of developing sperms.
- d) Produce testosterone hormone.***
- e) Formation of blood testis barrier.

8) All the followings are female genital system except? Select one:

- a) Uterine tube.
- b) Cervix of the uterus.
- c) Epididymis.***
- d) Cortex of the ovary.
- e) Vulva.

9) When reductional meiosis occurs in oogenesis? Select one:

- a) Intrauterine life.
- b) At birth.
- c) After puberty.***
- d) At menopause.
- e) After fertilization.

10) The Spermatogonium cells reach the testis at? Select one:

- a) The 3rd week.
- b) The 6th day.
- c) The 5th day.
- d) The 1st week.
- e) The 6th week.***
