

1. ● Epithelium and side of ulcer ☑ margin
2. ● Tethering ☑ dimbling
3. ● PVD MC ☑ atherosclerosis
4. ● Pitting oedema except ☑ Lymphatic
5. ● The end of bed ☑ abdominal symmetry
6. ● Retrosternal chest pain expect ☑ Oesophageal rupture 2-pulmonary embolism 3\_angina
7. ● Hematemesis ☑ vomiting coffee ground?
8. ● Splenomegaly expect ☑ start to examine from LIF
9. ● Normal palpable in abdominal examination ☑ inguinal lymph node
10. ● Cause of dullness expect ☑ Intestinal obstruction [resonance due to swallowed air]
11. ● Breast risk factor most important ☑ 1-genetic 2\_being female 3.age
12. ● 20 y female her mother dx with breast cancer at 31 died and her sister dx at 29 most implications ☑ significant associated with cancer
13. ● PVD chronic state ☑ Paralysis
14. ● Man with previous DVT in Right Leg now has ulcer Irregular edge ☑ sloping edge [venous ulcer mean heal ]
15. ● All cause of increase 1st heart sound expect ☑ Long PR interval
16. ● All are true except ☑ pneumonia and plural effusion cause increase vocal resonance [effusion decreased]
17. ● Jaundice wrong ☑ unconjugated cause clay stool with dark urine
18. ● Wrong statement ☑ Mitral regurgitation cause ejection systolic murmur [mini osci open snap with mitral stenosis in mid diastolic murmur]
19. ● Radio femoral delay ☑ aortic coarctation
20. ● Menorrhagia ☑ 80 ml
21. ● Normal beat ☑ 60\_100
22. ● Central cyanosis except ☑ left to right shunt [any thing cause increase in deoxyhemoglobin concentration cause cyanosis]
23. ● TRUE statement ☑ transmitted Thrill moderate to severe
24. ● 2ry dysmenorrhea ☑ endometriosis
25. ● Crepitation [crackles] in ☑
26. ● All associated with infective endocarditis except ☑ koilonychia [spoon shape associated IDA]
27. ● Consensual reflex ☑ pupil contraction when light in other pupil
28. ● Can't breathe when lying flat \*supine \*☑ Orthopnea
29. ● Dyspnea awake from sleep ☑ paroxysmal dyspnea
30. ● Unilateral pupil dilatation not response to light ☑ oculomotor nerve palsy?? (true is optic nerve )
31. ● Not cause splenomegaly ☑ SCA
32. ● Intermittent claudication ☑ ??????
33. ● All cause wheeze expect ☑

COPD

Bronchial Asthma

Heart failure [يتعمل]

Pulmonary fibrosis اظن الجؤاب

34. ● Felling Thrill ☑ grade 4 murmer
35. ● Loud with Thrill ☑ grade 4
36. ● Thyrotoxis most system affected ☑ (according to the doctors its CVS)
37. ● Drug induce Cough ☑ angiotensin inhibitor [ACE I we will replace it by ARBs to devoid SE]
38. ● Druge induce syncope except ☑ Beta agonist [which cause Palpitation]
39. ● TRUE about JVP ☑ decreased with inspiration
40. ● Wrong about JVP ☑ raped outward movement
41. ● Site to hear pulmonary valve ☑ 2ed left sternal border
42. ● TRUE ☑ milking test for IVC and portal HTN
43. ● Abdominal rigidty ☑ diffuse peritonitis
44. Vision test 20/30 mean \*\*\*
45. Radiology \*\*\*true is :MRI is non compitable prothesis
46. Symptoms of hyperthyrodisim expept : constipation
47. Intraabdominal fluid : shifiting dullness
48. Not a tip of health : express hand gestures
49. Internal jugular nerve BECAUSE :valve less
50. All true about spleen expept :ballotable test مو متأكدة لو اجا بالحرفية
51. Something you do :explain your roll
52. Something you not to do :asking about personality problem
53. Obese :30-39
54. All cause systolic Murmer expept :Austin flint murmer
55. Thyroid swelling true : movable with swallowing ?????
56. Mediastinal mass expept : carotid bruit[i guess its should be thyroid brui] ?????
57. Wronge statement.. Liver Upper edge in mid axillary [true mid clavicular]
58. ALL in PT profile except ☑ Social habiut
59. Stereotyping meaning
60. Best hearing with diaphragm ☑ 1st and 2ed
61. PVD risk factor ☑ Female?
62. Motor except ☑ vibration sence
63. Difference between vesicular breathing and Bronchial breathing
64. Trachal deviation
65. ALL are sign of infection expept ☑ coldness peripheral
66. Wronge about JVP ☑ has one peak
67. Barrel deformity definition
68. Wronge statement ☑ Positive burger test mean pallor
69. Hirstusm not by ☑ liver disease
70. Arterial pulse normL Range (جمل خطأ) باقي الخيارات وصف للشرابين
71. Jvp raises with abdominal pressure
72. Jvp above the sternal notch normal by 9 cm
73. S3 and S4 statement

Mini osci

1. goiter associated with all except :

- Iodin defecioncy
- Thyrotoxicosis
- Malignancy
- Pregnancy "xxxxx"
- Malnutrition

2. name :

Peudo orange

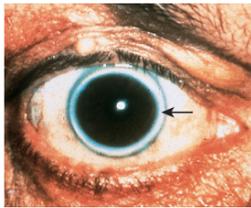

3. the floor of this ulcer :

- Muscle and tendon ×××××
- Blue tissue
- Healthy granulation tissue
- Gangrene tissue

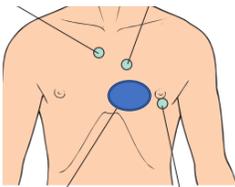

4. causes :

Lipid deposition .

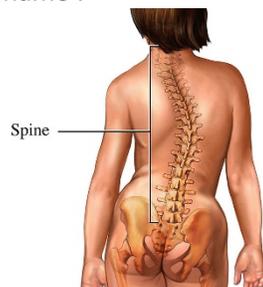

5. name : Cornea arcus

6. area of auscultation :

Tricuspid valve

7. name :

scoliosis

8.

Collapsing pulse

9.

flapping tremor in all expet :  
Hyperglycemia (  $\text{CO}_2$  retention by cause Komsomol breathing due to acidosis by lactic acid )  
Alcohol

10.

Pectus carinatum

11.
