

** Plaque : change of texture

Ex: psoriasis

+ biopsy :

- hormonal factor
- propriobacterial acne that forms Qnep

** Acne

**

For impitigo :

** Planter warts, when pared away" _ " "

Pediculosis :

1-common :hair

2-body: poor hygiene

3-crab :STD

-White lyce then suck blood and become brown .

we have to differentiate it from :

** photosensitive dermatitis:

-

** skin manifestations of internal malignancy : "
there is skin lesion with

pigmentary disorders

** Melasma : hyperpigmented patches comes with pregn(n)-3(8 TQ0.1h)-3(and:)J**ET**

hair & nail

** anagen phase of scalp hair differ from these hair in other areas , so each site in body has specific anagen phase period (Eyelashes , Eyebrows", í .)

** estrogen maintain hair in anagen phase in pregnancy , so n h03r ,ltetheses ,

- Rubra means red

-
