

Burn seminar wareed 2023

تبیض

- TBSA ::calculated from 2ed

-Most important point in mangment : aggresive iv fluid ( bec the patient is dehydrated: 3 space loss)

-Suspecting inhalation injuries: intubation

-Blister in 2 degree < بخليها

In3 degree < بشيلها

-We use Ringer lactate::

Bec it contains lactate which metabolite in liver to  $\text{HCO}_3^-$  > makes the pateint alkalosis ( in burn the body in acidosis )

- Indication for add-missions:  
+ 10% tbsa in 3 degree  
20% tbsa in 2 degree

--to avoid curling ulcer > give PPI

--Full thicknesses:  
increase cosmetic  
In small area ( face)  
Donor site needs repair
