60 cm from terminal ileum

Indication for surgery : symptomatic, grossly abnormal , palpable tissue inside

Cecal diverticulum : congenital, true diverticulum

Colonic diverticulum: mc complication

On right : hemorrhage

On left : inflammation

Psoas abscess : in older, trauma

Need antibiotics

Ct + gastrofin contrast (oral , water soluble) for diagnosis :

Uncomplicated diverticulitis : conservative management : oral antibiotics, laxative ..

Complicated : iv antibiotics

Analgesia

Iv fluid

Second day : لازم decrease pain , wbc's , crp

soft diet و antibiotics-for 2w
برجع الاكل شوي شوي اول سوائل بعدين

After 6 w : colonoscopy : to exclude CA (6w عشان قبلها increase risk got perforation)

بنبه عليه اذا رجع الالم او الحرارة او الاسهال :: ارجع
