**Wrong about hydrogen peroxide?**

**A-It is lipid insoluble**

**B-its lipid insoluble**

**Ans:a**

**1) According to Glutathione,one is wrong**

**a. Tripeptide**

**b. composed of glutamate, cysteine and glycine**

**c. Glucyine is highly reactive**

**d. sulphhydryl group is very reactive**

**e. sulphhydryl group provide electrons**

**Ans:C**

**52) All of them true about a-tocopherol except:**

**A)Is the most widely distributed antioxidant in nature**

**B)lipid-soluble antioxidant**

**C)lipid radicals produced in the lipid peroxidation chain reaction**

**D)food rich in vitamin E include olive oil, margarine, almonds, peanuts, meats, dairy and leafy greens**

**E) ascorbic acid regenrate the oxidised form of vit E.**

**Ans:E**

Peroxide group are generate ----- for killing invasive organisms by -----

-- :

- A) OH, neutrophils
- B) Hypochlorous acid, neutrophils
- C) Superoxide radicals, macrophages
- D) Nitric oxide, eosinophils

Ans:B

The true is :

- Superoxide dismutase known as primary defence against oxidative stress
