Lecture 2

BIOCHEMISTRY OF CONNECTIVE
TISSUES

biochemistry - lecture (2)

The carbohydrate metabolism error that affect mainly on ATP is :

- A- Debrancher enzyme deficiency.
- B- Phosphofructokinase deficiency.
- C- Myo-adenylate deaminase deficiency.
- D- Lactate dehydrogenase deficiency.
- E- Acid maltase deficiency.

Answer: C

all of the following enzymes in muscles are used for energy production except:

- A) carnitine acyltransferase
- B) lactate dehydrogenase
- C) phosphorylase
- D) debranching enzyme
- E) Adenine deaminase

Answer: E
