- b) rheumatoid arthritis

Answer:A

6. Sterile and clean wounds are:

Surgical wound

lecture (1)

** additional notes from surgery lecturer I guess it's important:*

1. Basics of Trauma Assessment (try to memorize them).

1. Preparation
2. Triage
3. Primary Survey (A,B,C,D and E)
4. Resuscitation
5. Secondary Survey
6. Monitoring and Evaluation, Secondary
7. adjuncts
8. Transfer to Definitive Care

2. seatbelt doesn't make protection to the lower limbs

3. why the bone is move? due to muscle effect

4. heavy smokers have a slow fracture healing than non ones

5. stress fracture occurs without major trauma

6. diagnosis of osteoporotic through dxa scan

7. osteopetrosis is increas in bone density

8. with open fracture we must give the patient antibiotics first of all

As I said,,iiiiii guess 👍🙄
