

QUIZ TIME

Anatomy head & neck

Done by : Asma'a Al thnaibat

Lec: 10

1-Which of the following describes the nature of the Maxillary nerve (V2)?

- A. Entirely Motor**
- B. Entirely Sensory**
- C. Both Sensory and Motor**
- D. Mixed autonomic and somatic**

2-The Maxillary nerve leaves the middle cranial fossa by passing through which opening?

- A. Foramen Ovale**
- B. Foramen Spinosum**
- C. Inferior Orbital Fissure**
- D. Foramen Rotundum**

3-Which branch of the Maxillary nerve supplies the dura mater in the middle cranial fossa?

- A. Pharyngeal branch**
- B. Zygomatic nerve**
- C. Infraorbital nerve**
- D. Meningeal branch**

4-In the pterygopalatine fossa, the Zygomatic nerve divides into which two branches that penetrate the zygomatic bone?

- A. Greater and Lesser Palatine nerves**
- B. Anterior and Middle Superior Alveolar nerves**
- C. Zygomaticotemporal and Zygomaticofacial nerves**
- D. Palpebral and Nasal branches**

5-The Posterior Superior Alveolar nerve supplies which of the following structures?

- A. Upper incisor and canine teeth**
- B. Upper premolar teeth**
- C. Upper molar teeth, mucosa of upper gum, and maxillary sinus**
- D. Skin and mucosa of the upper lip**

6-The continuation of the Maxillary nerve within the infraorbital groove and canal is known as the:

- A. Greater palatine nerve**
- B. Zygomatic nerve**
- C. Infraorbital nerve**
- D. Nasopalatine nerve**

7. What is the type of the Temporomandibular Joint (TMJ)?

- A. Fibrous joint**
- B. Cartilaginous joint**
- C. Synovial joint of the condyloid variety**
- D. Ball and socket joint**

8. The TMJ articulates below with which structure?

- A. The articular tubercle**
- B. The mandibular fossa**
- C. The head of the mandible**
- D. The zygomatic bone**

9. The Articular Disc divides the TMJ into which two cavities?

- A. Medial and Lateral**
- B. Anterior and Posterior**
- C. Upper and Lower**
- D. Superficial and Deep**

10. Which ligament of the TMJ lies on the medial side of the joint and is attached above to the spine of the sphenoid bone?

- A. Lateral temporomandibular ligament**
- B. Stylomandibular ligament**
- C. Sphenomandibular ligament**
- D. Articular capsule**

11. Which pair of nerves provides the nerve supply to the Temporomandibular Joint?

- A. Facial nerve and Glossopharyngeal nerve**
- B. Auriculotemporal nerve and Masseteric nerve**
- C. Lingual nerve and Inferior alveolar nerve**
- D. Deep temporal nerves and Buccal nerve**

12. The movement of Elevation of the mandible is produced by which group of muscles?

- A. Lateral pterygoid, mylohyoid, geniohyoid, and digastric**
- B. Medial pterygoid, temporalis, and masseter**
- C. Posterior fibers of the temporalis**
- D. Lateral and medial pterygoids acting alternately**

1-B

2-D

3-D

4-C

5-C

6-C

7-C

8-C

9-C

10-C

11-B

12-B
