

## PNS Nabed Archive

- 1-Tensor tympani attached to: handle of malleus
- 2-Which of the following is wrong about facial nerve ?  
Have only somatic motor and somatic sensory functions
- 3-case about propranolol : insomnia & nightmares
- 4-Which of the following doesn't stimulate satiety ?
- 5-Which of the following is not associated with sour taste? G-protein
- 6-Wrong about non-visual retina? Contains neurons
- 7- Wrong about GBS? Late onset >> 1-3 months
- 8-Which one of the following is not blood supply to the middle ear?
- 9- Drooping of shoulder is caused by injury of?
- 10-Head injury that causes increased depolarization of vagus results in : increased motility in gastrointestinal tract
- 11- 2<sup>nd</sup> messenger of phototransduction : cyclic AMP / **cyclic GMP**
- 12- Rate Limiting step : isomerization of retinal ester to retinol
- 13- Excitability definition
- 14- Question about Threshold
- 15-Parkinson's disease clinically manifested by a triad of cardinal motor symptoms :rigidity, bradykinesia and tremor
- 16-Case of Parkinson's disease, protein inclusions : substantia nigra
- 17- Wrong about Alzheimer's disease : intracellular amyloid and extracellular tau
- 18- Which of the following is wrong about the face : facial artery is the only supply of the face
- 19-Which of the following supply the ant temporal ? temporal / **zygomatic & temporal**
- 20-Supply of cornea & conjunctiva ? nasociliary
- 21- Sympathetic effect : bronchodilation
- 22-How retina involved in the visual pathway? Has the 1<sup>st</sup> and 2<sup>nd</sup> photoreceptors
- 23-Which of the following is wrong about prions? Has nucleic acid
- 24-Botulinism : inhibit the Ach release ?
- 25-Which of the following drugs is antiparkinsonian ?
- 26- Question about poliovirus
- 27-selective PDE4 inhibitor?
- 28-Which of the following drugs doesn't cause anosmia ?
- 29-Not longitudinal fasciculus : sympathetic
- 30- No complications in cornea transplant : avascular
- 31- Which of the following is wrong about cornea ? relatively avascular (anatomy question)
- 32-Which of the following is wrong about the lens ? the epithelium covers all of it ?
- 33-Which of the following is wrong about the lens ? the epithelium covers all of it ?
- 34-Stocking and gloves distribution is seen in peripheral neurons

بيوكيم الي متذكرتهم

(1)سؤال كان بده النقطة الي ما يختلف عليها

rods and cones&gt;&gt;

activation of 11 cis retinol to retinal

2)IP3 second messenger in  
Umammi,sweet,bitter

3)cones? color vision

4)site of receptor for smell  
\_at the apical of olfactory cell?

(5) بما معناه انه شو الخلية الي تكون

deoplarized in resting state without stimulus

-Photoreceptor cell?

\_bipolar cell?

6)visual adaptation>> time needed to adapt to  
new intensity

مايكرو

الخطأ حول سرعة انتقال ال

rabies&gt;&gt;&gt;

-450mm/day

case about child with flaccid muscle ,what the  
sample needed in diagnosis  
\_stool

(انا توقعت ان الحالة poliomyelitis)

infant with changed in cry ,his mom feeding him  
with honey>>>boutelinum
