(1) سؤال تكرر مرتين وفكرته انو ال femoral sheath  
مايمر فيه ال femoral nerve

(2) شو العضلة الي بتتضرر اذا صار كسر بال neck of fibula  
مايعرف جوابه

(3) في سؤال من الصورة تبع ال cranial nerves في انترودكشن ايمن انه العصب ٢/٣  
نسيت اي واحد

Sensory or motor

(4) سؤال عن ال clavicle وبين اضعف منطقة فيه  
الجواب :

The junction between the medial 2/3 convex and lateral 1/3  
concave

(5) كان في سؤال انه اي من الخيارات غلط

الغلط كان انه ال knee joint does not close by the capsule posteriorly  
بالسلايد anteriorly مكتوبة

(6) شو اكثر عضلتين بشبهو بعض ؟

Palmaris and plantaris

RECENT ACTIVITY

Sulaf Maaitah ▶ ارشيف ميد اناتومي

...

9 Mar 2019 at 10:59 •

هي الاسئلة السهلة مشان تتفائلو يعني

\*which one of these muscles isn't in the anterior compartment of forearm?

-Supinator

\*which one of these bones isn't present in the distal carpals?

-Scaphoid

\*regarding anatomical planes which one of thses is correct?

-Horizontal (transverse) plane is helpful for cross section studies

\*the muscle that has an (unlocking) function to prepare the leg for flexion

-popliteus

\*regarding relative movements of the body which one of these is correct?

-Inversion is the movement where the soles of the foot are facing medially

\*regarding adductor canal,which one of these is wrong?

-it doesn't include muscular nerves

\*regarding articulations between radius and ulna which one of these is correct?

-Pronation and supination are the only movements possible

\*femoral vein receives blood from?

-great saphenous vein مش متأكده
