[anatomy]

arteries and veins are found in which layer of the scalp :

- a. One
- b. Two ✓
- c. Three
- d. Four

Branch of ansa cervicalis not cutaneous :

C1 ✓

The most substantial part of the suspensory apparatus is :

Facial sheath ✓

Which of the following nerves give visceral sensory branch :

Glossopharyngeal nerve ✓

Insertion of the orbital part of orbicularis oculi :

Lower border of medial palpebral ligament ✓

Which of the following arteries supply the Ala of nose :

Superior labial artery ✓

Supply the mucous membrane of the larynx below the vocal cords, and the mucous membrane of the upper part of the trachea :

Recurrent laryngeal nerve ✓

Which of the following located in junction :

optic chiasma ✓

Site of optic canal :

In the lesser wing of sphenoid just medial to the superior orbital fissure ✓

The medial wall of vestibule:

forms the bottom of the internal auditory meatus ✓

[pharma]

The correct order of these fibers response to local anathesia :

Pain → sensory → motor ✓

adverse effect of propranalolol :

Nightmare and insomnia ✓

Case : adverse effect of alpha agonist :

postural hypotension ✓

Case: patient with an allergy of benzocaine ,the best topical analgesic to be used is :

- a) Cocain
- b) Buvicaine
- c) Procaine
- d) Tetracain
- e) Thiophnel sodium

Paitent present with angioedema and swelling mouth ,you give him the Adrenaline :

•Intramuscularly ✓

To treat open-angle glaucoma we use :

Dipivefrin ✓

Drug used in atropine toxicity:

Pralidoxim ✓

[histo]

All of the following considered epithelial receptors except

- a) Free nerve ending
- b) Olfactory epithelium
- c) Merkle tactile disk
- d) Meissner corpuscle ✓
- e) Plexus of bonnet

The layer where the LASIK technique done :

Connective tissue stroma ✓

All of the following are true about limbus except :

white color ✓

[biochem]

Which of the following is correct regarding to Schiff base bond :

Dissociate immediately ✓

Wrong about the mechanism of olfactory transduction :

influx of Cl^- ✓

[embryo]

All of the following are derived from the first pharyngeal arch except :

Stapes ✓

All of the following are true except:

Ultimate brachial body derived from first pharyngeal pouch ✓

1- all of the following from inter maxillary segment except :

a. philtrum

b. nasal septum

c. ala of the nose ✓

2- failure of fusion of the maxillary processes with the lateral nasal processes along the line of the nasolacrimal duct :

Oblique facial cleft ✓

[micro]

2Qs about the characters of *C.tetani* :

True : grow on meat broth media ✓

False : it's non motile ✓

All of the following are characteristic of GBS except :

Produces a narrow zone of alpha hemolysis ✓

All of the following true about polio virus except :

There are Four serotypes ✓

Which of the following virus cause hand foot and mouth disease

Coxsackie A ✓

Sandflies are the vectors of :

Rift valley fever ✓

[patho]

(case) : patient with flu-like symptoms:

Guilin barré syndrome ✓

All true about Korsakoff syndrome except:

acute ✓

*stocking and glove pattern causes:

Polyneuropathy ✓

All of the following are neurodegenerative diseases except :

Multiple sclerosis ✓

All true about multiple sclerosis except :

a) female more than male 2:1

b) active phase there is decrease in inflammatory cell and little to no myelin ✓

***Q about CIPD :One is wrong?

^^ الخيارات من السلايدات لكن نسينا الخطأ منهم

[Surgery]

All of the following Motor somatic Symptoms of polyneuropathy , EXCEPT:

- Weakness
- flaccidity
- Hyporeflexia
- Fasciculations
- hypotrophy ✓

****Secondary action of superior oblique muscle:**

Depression,abduction

[physio]

True about chronaxie :

It's the measure of excitability ✓

[Lab Physio]

Concerning presbyopia. all are true EXCEPT:

- a- It starts earlier in hyperopic patients
- b- There is a gradual increase in the amplitude of accommodation ✓
- c- There a gradual recession of the near point
- d- Lens capsule becomes less elastic and lens nucleus becomes harder
- e- It is treated by convex lenses added to the distance correction

About conductive deafness which is wrong :

Positive rinene test ✓
