

Boundaries of the lateral ventricle

	Roof	Floor	medial	lateral
body	trunk of corpus callosum.	from lateral to medial; a- <u>Body of caudate nucleus.</u> b- <u>Stria terminalis</u> and the thalamostriate vein. c- Superior surface of the thalamus. d- Choroid plexus of the lateral ventricle e- Lateral margin of the body of fornix	septum pellucidum	_____
Anterior horn	anterior part of trunk of corpus callosum	rostrum of corpus callosum.	septum pellucidum Anterior wall: posterior surface of the genu of corpus callosum.	the head of caudate nucleus.
Posterior horn	tapetum of corpus callosum	_____	Infero-Medial wall; shows 2 elevations; a- <u>Upper elevation</u> (bulb of posterior horn); is formed by the forceps major. b- <u>Lower elevation</u> (calcar avis); produced by the calcarine sulcus.	tapetum of corpus callosum
Inferior horn	1) <u>Tail of caudate nucleus</u> 2) <u>the tapetum of the corpus callosum</u> 3) Amygdaloid body. 4) <u>Stria terminalis.</u>	lateral to medial; a- collateral eminence produced by the collateral sulcus. b- Hippocampus c- Fimbria of the hippocampus	_____	_____
