

155- Exotoxins :

- a- Lipoproteins
- b- LPS
- c- Nucleic acid
- d- Proteins
- e- Peptidoglycan

156- Which one of the following best describes the mode of action of endotoxins :

- a- Drgrades lecithin in cell membrane
- b- Hypertension
- c- Block release of acetyl choline
- d- Causes the release of tumor necrosis factor

157- Enzyme which can destroy neutrophils and macrophages :

- A- Leukocidins
- B- IgA protease
- C- Coagulase
- D- Collagenase

General virology

158-Which of the following statmenets about virus induced cytopathic changes is most accurate :

- a- They are pathognomonic for an infecting virus
- b- They are rarely associated with cell death
- c- They may include giant cell formation
- d- They can only be seen by an electron microscope

159-Which of the following can be used to quantitate the titer of infectious viruses :

- a- Plaque assay
- b- Electron microscopy
- c- Hemagglutination
- d- PCR
- e- Enzyme immunoassay

160-Which of the following statements regarding virus morphology is true :

- a- All RNA viruses are spherical in shape
- b- Some viruses contain flagella
- c- Some viruses with DNA genome contain nucleus
- d- Viral surface proteins protect viral genome from nucleases
- e- Helical nucleocapsid are found with single stranded DNA virus

161-Prion is an atypical virus that contain which of the following :

- a- Circular RNA
- b- Multiple copies of plasmid
- c- No detectable nucleic acid
- d- Double stranded RNA
- e- Host cell DNA Instead of viral DNA

162-Which of the following statements best describe virus :

- a- Obligatory extracellular parasites
- b- Can be grown on blood agar
- c- Contain both DNA and RNA
- d- Can be treated by antibiotics
- e- Very small in size 20-300 nm

163-Viral replication :

- a- Occurs by binary fission
- b- Requires host cell macromolecules
- c- Can be prevented by antibiotics
- d- Can occur in synthetic media

164-The protein coat which surrounds the nucleic acid of animal viruses is called :

- a- Envelope
- b- Nucleocapsid
- c- Capsomer
- d- Capsid

165-Capsid symmetry found in smallpox VIRUS IS :

- A- Helical
- B- Complex
- C- Icosahedral
- D- Non Of These

166-One of the following statements is not true for viruses :

- a- Contain either DNA or RNA
- b- Lack mitochondria
- c- Contain protein coat
- d- Multiply by binary fission
