

# Anaesthesia final

Wateen Archive

1- All the following are indicators for central venous catheter, except?

- A. Blood transfusion
- B. Medication
- C. Chemotherapy
- D. **Coagulopathy**

2- All of the following are effects of Mu receptor stimulation, except?

- A. Miosis
- B. Constipation
- C. Respiratory depression
- D. **Sedation**

3- All of the following are side effects of Morphine, except?

**Increase the peristalsis movement**

4- inferior lead in ECG?

**2/3/avf**

5- Duration of pr interval?

**.12 - .20 sec**

6- CPP?

**75 mmHg**

7- Tracheostomy puncture should be done at?

**Between the second and third tracheal ring**

8- The most superior cartilage in the larynx?

Epiglottis

9- All of the following drugs include constipation as a side effect, except?

A. Tramadol

B. Colchicine

C. Morphine

D. Fentanyl

10- Hypoxemia ?

Decrease  $O_2$  in blood

11- The Mac of drug x = 1.15, y is considered as the best inhalational agent for induction, and z required the use of electrically heated ?

x: isoflurane, y: sevoflurane, z: desflurane

12- Malignant hyperthermia?

Increase tidal  $CO_2$

13- True about cannula?

Blue 22, 36%

14- false about stages of anaesthesia?

A. Stage 1: amnesia and delirium

B. Cease of eyeballs movement occur in stage 2

C. Stage 3 doesn't cause respiratory depression

15- Ketamine, except?

Bronchoconstriction

16- Coronary steal?

Isoflurane

17- Goremark grade 3?

Only we can see the epiglottis

18- Mallampati score, class 3?

Base of uvula and soft palate

19- All of the following are true about opioid with regional anesthesia except?

promote sensory block spring and faster recovery

20- unable to breath after one hour of giving succinylcholine?

A. Pseudocholinesterase mutation

B. Homogenous atypical

21- CPR check breath?

Not more than 10 sec

22- isotonic solution?

A. Na is 150

B. Cl is 150

C. Ph less than 7 but higher than 4.5

D. K more than 5

E. All are true

😊 الجواب مش أكيد لأنه ما بنعرف اذا الدكتور كان بده الصح ولا الخطأ

23- isotonic false?

NACL 1.8%~7.6%

24- All effect the rate of Inhalational agent induction , except ??

- a. **History of malignant hypothermia**
- b. Tension gas composition
- c. Pulmonary ventilation

25- All true about spinal anesthesia , except ?  
**use without opioids**

26- false about depolarized muscle relaxant?

- A. Bradycardia
- B. Hypotension
- C. Intraocular pressure drop
- D. Hypokalemia
- E. Muscle pain

27\_ post DPH ?

**Less likely to occur after 24h**

28- Indication for succinylcholine?

**Transient hypokalemia**

29- N2O contraindication except?

- A. laparoscopy
- B. Corneal surgery

30- the false statement?

- A. Trachia: 15-20 ring
- B. 6 cartilage
- C. C3 to c 6
- D. Upper folds is true focal cord

غالباً جواب السؤال D لأنه ان lower هي ان true 

31- Aβ0?

Incompatibility cause lysis

32- About spinal anaesthesia, except?

A. No decrease in expiratory reserve volume

B. Hyperperistalsis

33- wrong about opioid?

A. Decrease ADH

B. Affect the TV

34- false about cormark grading?

Cormark 3 only aretenoid is visible

35- All of the following are cause inaccuracy in flow meter, except?

كـد الخيارات كانت من سلايد السيمنار ما عدا خيار واحد (وهو الجواب)

Inaccuracy in flowmeters are due to:

- The tube not being vertical.
- Back-pressure, from for example, a ventilator.
- Static electricity causing the float to stick to the tube.
- Dirt causing the float to stick to the tube

36- The best mapleson type for controlled breathing is?

Type D

37- all of the following decrease the mac, except?

A. Hypernatremia

B. Hypothermia

C. Hyperthermia

D. Elderly patient

E.  $P_{aO_2} < 42$

38-

سؤال عن ال pharyngeal abnormality من معلومات ABG

39-

سؤال عن حساب ال GCS

40-

سؤال عن ال D5W كان بده الفلظ عنها وغالبا انها ما بتعمل ديليوشن لإشي بس مش متذكرة باقي  
خيارات السؤال

41-

سؤال عن ال iv fluid وكان بده الخطأ، الجواب كان

Isotonic > normal saline 7.4
