

# ABDOMINAL WALL

| muscles                     | Origin   | Insertion  |
|-----------------------------|--|--|
| External Oblique Muscle     | External surfaces of 5th--12th ribs  | Linea alba, pubic tubercle, and anterior half of iliac crest                                       |
| Internal Oblique Muscle     | Thoracolumbar fascia, anterior two-thirds of iliac crest, and lateral half of inguinal ligament                            | Inferior borders of 10th--12th ribs, linea alba, and pecten pubis via conjoint tendon              |
| Transverse Abdominal Muscle | Internal surfaces of 7th-12th costal cartilages, Thoracolumbar fascia, iliac crest, and lateral third of inguinal ligament | Linea alba with aponeurosis of internal oblique, pubic crest, and pecten pubis via conjoint tendon |

في عضليتين يربضه بس الدكتور ماذكر الـ origin والـ insertion

Rectus Abdominis Muscle

PYRAMIDALIS

## Nerves

1. Thoracoabdominal nerves
2. Lateral (thoracic) cutaneous branches
3. Subcostal nerve
4. Iliohypogastric and ilioinguinal nerves

## Arteries

- ❖ Superior epigastric artery
- ❖ Inferior epigastric artery
- ❖ Deep circumflex iliac
- ❖ Superficial circumflex iliac a.
- ❖ Superficial epigastric a.
- ❖ Subcostal artery a.
- ❖ Musculophrenic a.
- ❖ 10th and 11th posterior intercostal arteries

## Veins

Above <sup>umbilicus</sup>  
lateral thoracic vein to axillary vein

below <sup>umbilicus</sup>

superficial epigastric and great saphenous veins to femoral vein

Superficial

Above <sup>umbilicus</sup>  
axillary (pectoral) group of nodes

below <sup>umbilicus</sup>  
superficial inguinal nodes

deep

internal thoracic, external iliac, posterior mediastinal, and para-aortic (lumbar) nodes

## Lymph Drainage
