Lecture one (1)

1. What type of immunity is provided by mothers milk?

- a. Naturally active
- b. Naturally passive
- c. Artificially active
- d. Artificially passive

Answer: B

.....

2. Most immunogenicity is?

- a. Protein
- b. Lipid
- c. Carbohydrate
- d. Amino acid

Answer: A

.....

3. Active artificially immunity is a result of:

- a. Injection of an immune serum
- b. Contact with a pathogen
- c. Antibodies passed on from mother to fetus through the placenta
- d. Vaccination
- e. Antibodies passed on from mother to baby through breast milk

Answer: D.

.....

4. All of the following are true of antigen EXCEPT which one of the following:

- A. They contain epitopes
- B. They will react with antibodies
- C. They contain antigenic determinants
- D. They can elicit an immune response
- E. They contain paratopes

Answer: E

.....

5. Which of the following substances will not stimulate an immune response unless they are bound to a larger molecule:

- A. Antigen
- B. Virus
- C. Hapten
- D. Miligen
- E. Antibody

Answer: C

.....
