Ans :b

Caries on the proximal surfaces of premolars and molars are classified as:

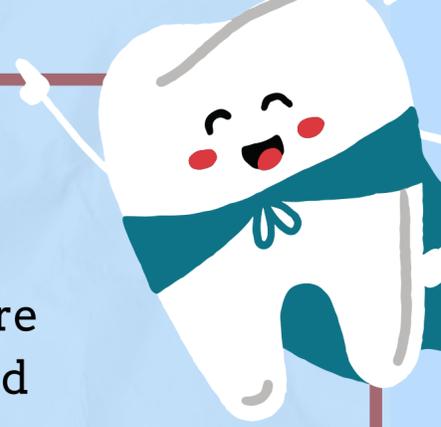

- a. Class I
- b. Class III
- c. Class II
- d. Class V

Ans c

Caries that involves the proximal surface of an anterior tooth and the incisal edge is classified as:

- a. Class III
- b. Class IV
- c. Class V
- d. Class VI

Ans:b

Which of the following metals is a major component of dental amalgam?

- a. Gold, zinc, aluminum
- b. Mercury, silver, tin, copper
- c. Nickel, cobalt, iron
- d. Titanium, zinc, silver

Ans:b

Composite resins can be used in which teeth?

- a. Only anterior teeth
- b. Only posterior teeth
- c. Both anterior and posterior teeth
- d. Only primary teeth

Ans:c

وَعَسَى أَنْ تَكْرَهُوا شَيْئًا وَهُوَ خَيْرٌ لَكُمْ  
وَعَسَى أَنْ تُحِبُّوا شَيْئًا وَهُوَ شَرٌّ لَكُمْ  
وَاللَّهُ يَعْلَمُ وَأَنْتُمْ لَا تَعْلَمُونَ ﴿٣٦﴾
