

QUIZ TIME

Anatomy head & neck

Done by : Bashar Alzyoud

Lec: 14

1. Which of the following bones is the largest and strongest bone of the face?

- a) Zygomatic bone
- b) Maxilla
- c) Mandible
- d) Nasal bone

Correct Answer: c) Mandible

2. The two halves of the mandible fuse at the symphysis menti during which period of life?

- a) Before birth
- b) The 1st or 2nd year of life
- c) Puberty
- d) Adulthood

Correct Answer: b) The 1st or 2nd year of life

3. The mandible articulates with the skull to form which joint?

- a) Atlanto-occipital joint
- b) Temporomandibular joint (TMJ)
- c) Zygomaticomaxillary joint
- d) Coronal suture

Correct Answer: b) Temporomandibular joint (TMJ)

4. Which structure on the medial surface of the mandibular ramus transmits the inferior dental nerve and vessels?

- a) Lingula
- b) Mylohyoid groove
- c) Mandibular foramen
- d) Pterygoid fovea

Correct Answer: c) Mandibular foramen

5. The muscle that is inserted into the lateral surface of the mandibular ramus is:

- a) Temporalis
- b) Lateral pterygoid
- c) Medial pterygoid
- d) Masseter

Correct Answer: d) Masseter

6. The Mylohyoid groove begins behind which feature on the medial surface of the ramus?

- a) Coronoid process
- b) Condylod process
- c) Lingula
- d) Mental foramen

Correct Answer: c) Lingula

7. The Coronoid process is the insertion point for which muscle?

- a) Masseter
- b) Lateral pterygoid
- c) Temporalis
- d) Buccinator

Correct Answer: c) Temporalis

8. The head of the Condylod process articulates with which structures to form the TMJ?

- a) Mandibular foramen
- b) Pterygoid fovea ● c) Mandibular fossa and articular eminence
- d) Symphysis menti

Correct Answer: c) Mandibular fossa and articular eminence

9. Which of the following structures is located on the outer surface of the body of the mandible?

- a) Mylohyoid line
- b) Submandibular fossa
- c) Mental foramen
- d) Genial tubercles

Correct Answer: c) Mental foramen

10. Which muscle is inserted into the Pterygoid fovea on the neck of the condylod process?

- a) Masseter
- b) Lateral pterygoid
- c) Temporalis
- d) Medial pterygoid

Correct Answer: b) Lateral pterygoid

11. Which of the following structures is located on the inner surface of the body of the mandible?

- a) Oblique line
- b) Incisive fossa
- c) Sublingual fossa
- d) Mental protuberance

Correct Answer: c) Sublingual fossa

12. Which nerve and vessels pass through the Mylohyoid groove?

- a) Inferior dental nerve and vessels
- b) Mylohyoid nerve and vessels
- c) Facial nerve
- d) External carotid artery

Correct Answer: b) Mylohyoid nerve and vessels
