**Q1. Which of the following is incorrect about the DTP vaccine?**

- A) It is given in two doses.
- B) It is administered intramuscularly (IM).
- C) It is injected into the upper arm.
- D) It contains live attenuated viruses.

**Answer: A) It is given in two doses.**

**Q2. If a school has 150 students, how many water taps should it have?**

- A) 2
- B) 3
- C) 4
- D) 5

**Answer: B) 3**

**Q3. What is the pH of unpolluted rainwater?**

- A) 2.1
- B) 4.3
- C) 5.6
- D) 7.8

**Answer: C) 5.6**

Q4. A) Because hot liquids and steam transfer heat rapidly to the skin.

Q5. Regarding children's school meals, which of the following is correct?

- A) One-third of daily calories and one-fourth of daily protein
- B) One-third of daily calories and half of daily protein
- C) One-third of daily calories and one-third of daily protein
- D) One-fourth of daily calories and one-fourth of daily protein

**Answer:** B) One-third of daily calories and half of daily protein.

Q6. Which of the following is correct regarding school regulations in Jordan?

- A) Jordan has no regulations for classroom sizes.
- B) The minimum space per student must be 1.5 square meters.
- C) In rural areas, 0.8 square meters per student is acceptable.
- D) Window space must cover 20% of the classroom area.
- E) The last step of the staircase must be 10 meters away.

**Answer:** D) Window space must cover 20% of the classroom area.

**Q7. Which virus is most commonly responsible for causing pneumonia?**

- A) Influenza virus
- B) Respiratory syncytial virus (RSV)
- C) Herpes simplex virus
- D) Hepatitis virus

**Answer: B) Respiratory syncytial virus (RSV)**

**Q8. Which of the following is correct regarding breastfeeding and weaning?**

- A) Breastfeeding should be stopped if the baby has diarrhea.
- B) Solid foods should be introduced at 9 months of age.
- C) Breastfeeding can continue beyond 6 months, alongside solid foods.
- D) Only The nipple should be covered during breastfeeding to avoid discomfort.

**Answer: C) Breastfeeding can continue beyond 6 months, alongside solid foods.**

**Q9. A child is suffering from itching, and the mother tells the doctor that the child puts his hand in his mouth while it is not clean. What is likely the diagnosis?**

- A) Chickenpox
- B) Atopic dermatitis
- C) Enterobius vermicularis (Pinworm)
- D) Scabies

**Answer: C) Enterobius vermicularis (Pinworm)**

**Q10. When should the pertussis vaccine not be given?**

- A) When the child has a fever
- B) When the child is experiencing a collapse or shock
- C) When the child has a mild cough
- D) When the child has a runny nose

**Answer: B) When the child is experiencing a collapse or shock.**

**Q11. Which of the following is a temporary contraindication for a vaccine?**

- A) Pregnancy
- B) Severe allergic reaction to a previous dose
- C) Immunocompromised condition
- D) Severe fever

**Answer: A) Pregnancy**

**Q12. which of the following given IM**

- A) OPV
- B) DPT
- C) MMR
- D) BCG

**Answer: (B) DPT**

**Q13. All of the following are true except**

- A) Cancer is less frequent (70,80)
- B) It seems that if an old person passes the age 70 years without dying of cardiovascular diseases or malignant conditions
- C) The commonest cancer is stomach cancer
- D) Cancer increase after age 80 years

**Answer: (D) Cancer increase after age 80 years**

Q14. Which of the following is false

- A) 79 is an old
- B) 86 is an old old
- C) 73 is an old

**Answer: c 73 is an old**

Q15. Which of the following is a contraindication for using an IUD (Intrauterine Device)?

- A) Cardiovascular disease
- B) Diabetes
- C) Hypertension
- D) Asthma

**Answer: A) Cardiovascular disease**

Q16. What is the most common reason for IUD removal?

- A) Bleeding
- B) Pain
- C) Infection
- D) Expulsion

**Answer: B) Pain , not sure**

Q17. What is the most commonly used natural method of family planning (FP)?

- A) Calendar method
- B) Withdrawal method
- C) Basal body temperature method
- D) Lactational amenorrhea method (LAM)

**Answer: D) Lactational amenorrhea method (LAM) , not sure**

Q18. False about IUD?

lipase loop is 3rd gen

**Q19. All the following are spacing methods of family planning except:**

- A) Lactational amenorrhea method (LAM)
- B) IUD
- C) Terminal method
- D) Condoms

**Answer: C) Terminal method**

**Q20. Which of the following is incorrect regarding vaccine storage?**

- A) BCG, measles, and rubella vaccines are sensitive to both heat and light.
- B) Measles, MR, MMR vaccines are supplied in dark brown glass vials to protect them from heat damage.
- C) Hepatitis B, Hib (liquid), DTP, DT, Td, and TT vaccines are sensitive to both heat and freezing.
- D) All freeze-dried vaccines become more heat-sensitive after reconstitution.

**Answer: B) Measles, MR, MMR vaccines are supplied in dark brown glass vials to protect them from heat damage**

**Q21. Which of the following is incorrect regarding the proper placement of a refrigerator for vaccine storage?**

- A) The refrigerator should be placed in a shaded area, away from direct sunlight.
- B) The refrigerator should be placed next to a wall for better airflow.
- C) The refrigerator should be kept in a cool area with proper ventilation.
- D) The refrigerator should be placed under direct sunlight and against a wall.

**Answer: D) The refrigerator should be placed under direct sunlight and against a wall**

**Q22. Which of the following is a source of sulfur dioxide?**

- A) Burning power plant
- B) Leaded gas
- C) Unpaved roads
- D) Car exhaust

**Answer: A) Burning power plant**

**Q23. Which of the following causes air pollution to accumulate to much higher than normal levels?**

- A) Ozone layer depletion
- B) Temperature inversion
- C) Acid rain
- D) Greenhouse effect

**Answer: B) Temperature inversion**

**Q24. What is primary pollution?**

- A) Released directly into the air
- B) Reaction of sunlight with nitrogen oxides to form smoke and fog
- C) Reaction of sulfur dioxide ( $\text{SO}_2$ ) with water to form sulfuric acid
- D) Formation of ozone at ground level

**Answer: A) Released directly into the air**

Q25. Which of the following is defined as any contaminant added to the air that is harmful to the health of living organisms?

- A) Water Pollution
- B) Soil Pollution
- C) Air Pollution
- D) Noise Pollution

**Answer: C) Air Pollution**

Q26. Which of the following is correct regarding B2 deficiency?

- A) It causes scurvy.
- B) It causes angular stomatitis and cheilosis.
- C) It causes rickets.
- D) It causes pellagra.

**Answer: B) It causes angular stomatitis and cheilosis.**

Q27. Which of the following refers to any person, animal, plant, soil, or substance in which an infectious agent normally lives and multiplies?

- A) Carrier
- B) Reservoir
- C) Vector
- D) Host

**Answer: B) Reservoir**

Q28. Which of the following refers to an outbreak of disease that attacks many people at about the same time and may spread through one or several communities?

- A) Endemic
- B) Epidemic
- C) Pandemic
- D) Sporadic

**Answer: B) Epidemic**

Q29. All of the following about family planning are true except

- A) Advice on sterility
- B) Sex Education
- C) Consultation and examination
- D) In-Vitro fertilisation

Answer: D) In-Vitro fertilisation

Q30. One of the following is false about the criteria pollutants

- A) Carbon dioxide
- B) Nitrogen oxide
- C) Lead
- D) Sulphur Dioxide

Answer: A) carbon dioxide

Q31. Which of the following natural family planning methods is the most effective?

- A) Basal body temperature (BBT) method
- B) Cervical mucus method
- C) Symptomatic method
- D) Calendar techniques

Answer: B) Cervical mucus method, not sure

Q32. All the following are correct about absolute contraindications except:

- A) Cancer
- B) Undiagnosed abnormal uterine bleeding
- C) Nursing mothers
- D) Thromboembolism

Answer: C) Nursing mothers

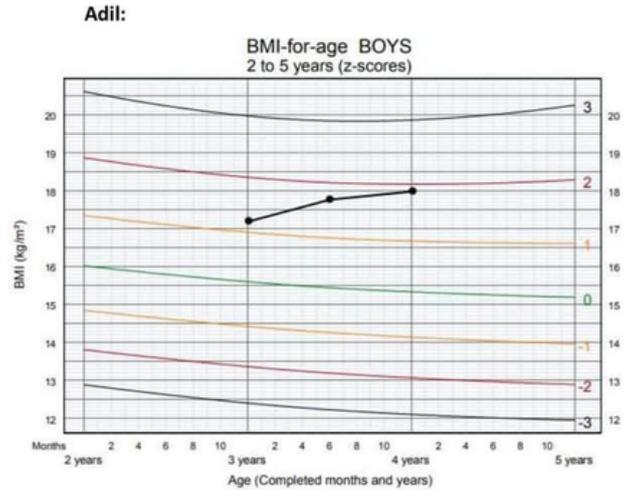

Q33. Which of the following is incorrect about the heel test?

- A) Sickle cell disease
- B) Galactosemia
- C) Hypothyroidism
- D) Congestive heart failure

Answer: D) Congestive heart failure

اجازي هيك بس كان الخط من فوق الصفر لفوق الواحد وكان طالب الصح .

possible risk of overweight الي هو

Q35. All of the following are true about London smog except

- A) As a result of this disaster, London passed its own clean air act
- B) Make chimneys taller to reach above a temperature inversion
- C) والخيار الخطأ كان كأنه أسم الغاز

Q36. Which of the following is not a primary prevention measure?

- A) Being physically active
- B) Avoiding tobacco use
- C) Eating a healthy diet
- D) Avoiding alcohol
- E) Screening for diseases

Answer: E) Screening for diseases

Q37. Which of the following is incorrect about the polio vaccine?

- A) OPV is a liquid vaccine comprising three serotypes of live attenuated poliovirus.
- B) The vaccine is administered orally.
- C) Dose: 2 drops.
- D) The injection polio vaccine is for eradication.

Answer: D) The injection polio vaccine is for eradication.

Q38. What is the recommended daily dosage of folic acid supplementation for pregnant women?

- A) 300 mcg
- B) 600 mcg
- C) 400 mcg
- D) 500 mcg
- E) 200 mcg

**Answer:** B) 600 , not sure

Q39. Which of the following is incorrect about the ICIDH and ICF?

- A) ICIDH was replaced by ICF.
- B) ICF stands for International Classification of Functioning, Disability, and Health.
- C) ICIDH stands for International Classification of Impairments, Disabilities, and Handicaps.
- D) ICIDH and ICF both serve the same purpose.

**Answer:** D) ICIDH and ICF both serve the same purpose.\*Same idea of question

Q40. The incorrect statement:

infant mortality rates is higher than under 5 children mortality rate

**“Life is brief, but impact is everlasting.”**

**الحياة قصيرة، لكن الأثر طويل!**
