The Palatine tonsils of the male is?

Select one:

O a. Endoderm

O b. Mesoderm

O c. Ectoderm

O d. Exoderm

O e. Hypoderm

What is the gastrulation?

Select one:

o a. Embryo after fertilization

◦ b. Embryo before implantation

◦ c. Embryo in the third week

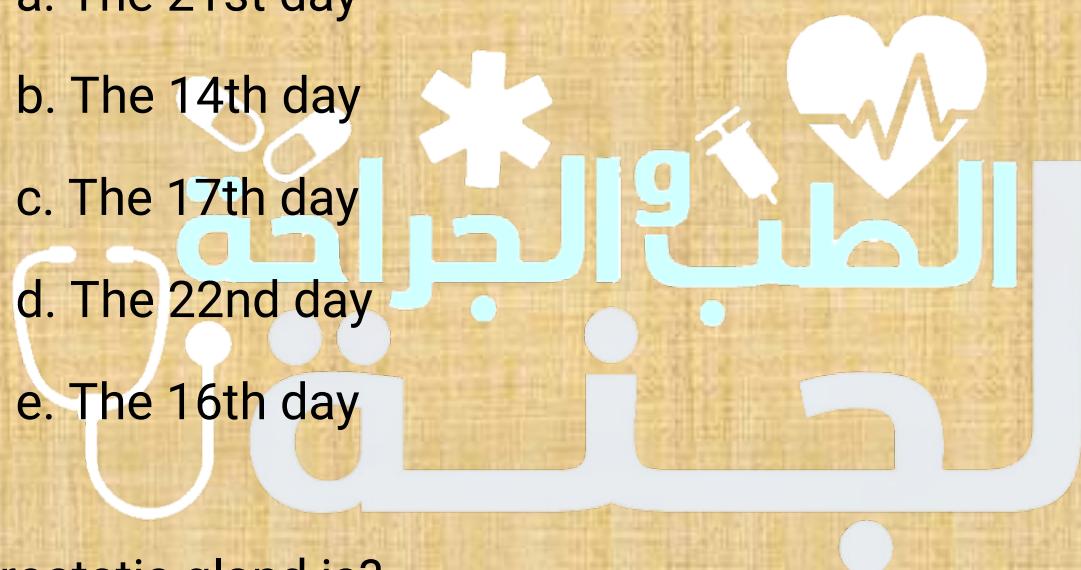

◦ d. Embryo in the first week

- o e. Embryo in the second week

Intraembryonic mesoderm is separated from ectoderm and endoderm?

Select one:

- O a. The 21st day
- O b. The 14th day
- O c. The 17th day
- O d. The 22nd day
- O e. The 16th day

The prostatic gland is?

Select one:

- O a. Endoderm
- O b. Mesoderm

O c. Ectoderm

O d. Exoderm

O e. Hypoderm

Cells of the primitive streak proliferate and migrate?

Select one:

O a. Cranial

O b. third directions

O C. Caudal

O d. Ventral

O e. Dorsal

Which hormone stimulate the development of the breast?

Select one:

- O a. Human chorionic gonadotrophic hormone
- O b. Human Chorionic corticotrophin hormone
- o c. Human Chorionic thyro trophin hormone
- o d. Human Chorionic somato mammothrophin hormone
- o e. Estrogen and progesterone hormones

Persistence of the vitellointestinal duct, meaning?

Select one:

- O a. Vitelline fistula
- O b. Meckel's diverticulum
- O c. Fibrous band

O d. Viteline cyst

O e. Vitelline sinus

Intraembryonic mesoderm is developed from?

Select one:

O a. Primitive stroke

O b. Primitive notochord

O c. Primitive streak

O d. Primitive node

O e. Primitive pit

The epiblast of the male is?

Select one:

o a. Endoderm

o b. Mesoderm

o C. Ectoderm

o d. Exoderm

o e. Hypoderm

Exocoelomic cyst is part of?

Select one:

O a. Endoderm

O b. Mesoderm

O c. Ectoderm

O d. Exoderm

O e. Hypoderm

The cervix of the uterus is developed from?

Select one:

O a. Intermediate part of somite

O b. Lateral mesoderm

O c. Ventromedial part of somite

O d. Intermediate mesoderm

O e. Dorsolateral part of somite

The middle part of ureter is developed from?

Select one:

O a. Intermediate part of somite

O b. Lateral mesoderm

O c. Ventromedial part of somite

O d. Intermediate mesoderm

O e. Dorsolateral part of somite

How many septa in placenta?

Select one:

O a. 15-20

O b. 16-21

O c. 14-19

O d. 15-19

O e. 14-20

How many vessels in the definitive umbilical cord?

Select one:

O a. Three

O b. Five

O C. TWO

O d. Four

O e. One

The source of the notochord is?

Select one:

O a. Hansen's membrane

O b. Primitive node

O c. Amniotic cavity

O d. Primitive streak

O e. Prechordal plate

The lacrimal gland is?

Select one:

O a. Endoderm

O b. Mesoderm

O c. Ectoderm

O d. Exoderm

O e. Hypoderm

Function of neuroenteric canal?

Select one:

O a. Maintains the closure between amniotic cavity and yolk sac

O b. Maintains the drainage of amniotic cavity

O C. Maintains the pressure between amniotic cavity and yolk sac

O d. Maintains the drainage of yolk sac

o e. Maintains the connection between amniotic cavity and yolk sac

All following are composition of amniotic fluid except?

Select one:

O a. Protein

O b. Turbid water

O c. Fat

O d. Carbohydrate

O e. Salts

The thyroid gland is?

Select one:

O a. Endoderm

O b. Mesoderm

O c. Ectoderm

O d. Exoderm

O e. Hypoderm

All following are functions of amniotic fluid except?

Select one:

O a. Dilatation of the cervix of the uterus

O b. Facilitates delivery of the fetus

O C. Prevents adhesion of the parts of the fetus

O d. Protection of the fetus against internal trauma

O e. Development of suckling reflex

The last cervical vertebrae is developed from?

Select one:

O a. Intermediate part of somite

O b. Lateral mesoderm

O c. Ventromedial part of somite

O d. Intermediate mesoderm

O e. Dorsolateral part of somite

The spermatogonia cells reach the testis at?

Select one:

O a. The 3rd week

O b. The 4th day

O C. The 5th day

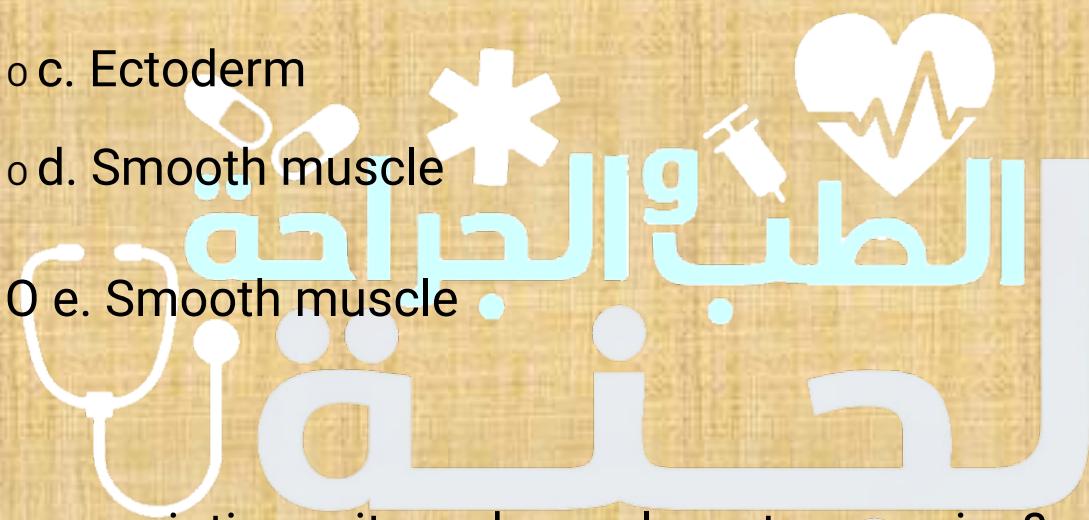

O d. The 1st week

O e. The 4th week

Prechordal plate is?

Select one:

- O a. Endoderm
- o b. Mesoderm
- o c. Ectoderm
- o d. Smooth muscle
- O e. Smooth muscle

One amniotic cavity and one placenta, meaning?

Select one:

- O a. Diamniotic / dichorionic twins
- o b. Monoamniotic / dichorionic twins
- O c. Diamniotic / monochorionic twins

- d. Conjoined twins
- e. Monoamniotic / monochorionic twins

The first rib is developed from?

Select one:

- a. Intermediate part of somite
- b. Lateral mesoderm
- c. Ventromedial part of somite
- d. Intermediate mesoderm
- e. Dorsolateral part of somite

The spermatogonia cells reach the testis at?

Select one:

- a. The 3rd week

- O b. The 4th day
- O c. The 5th day
- O d. The 1st week
- o e. The 4th week

The placenta penetrates the uterine wall and attaches to the ureter, called?

Select one:

- O a. Placenta accreta
- O b. Placenta praevia centralis
- O c. Placenta increta
- O d. Placenta praevia marginalis
- O e. Placenta percreta

The notochord is stopped at?

Select one:

- O a. Buccolaryngeal membrane
- o b. Prechordal sac
- O c. Cloacal membrane
- O d. Prechordal plate
- O e. Heuser's membrane

Which part separated from the embryo?

Select one:

- O a. Chorionic vesicle
- O b. Primitive yolk sac
- O c. Blastocyst
- O d. Secondary yolk sac
- O e. Definitive yolk sac

The ciliary ganglia is related to?

Select one:

- O a. The 3rd cranial nerve
- O b. The 9th cranial nerve
- O c. The 7th cranial nerve
- O d. The 5th cranial nerve
- O e. The 10th cranial nerve

The pancreatic gland is?

Select one:

- O a. Endoderm
- O b. Mesoderm
- O c. Ectoderm

O d. Exoderm

O e. Hypoderm

Formation of blastocyst?

Select one:

O a. The 15th day

O b. The 4th day

O c. The 7th day

O d. The 5th day

O e. The 14th day

Which hormone important for maintaining growth of the corpus luteum?

Select one:

- O a. Human chorionic gonadotrophic hormone
- O b. Human Chorionic cortico trophin hormone
- O c. Human Chorionic thyro trophin hormone
- O d. Human Chorionic somato mammo-trophin hormone
- O e. Human Estrogen hormones

The right ovary is developed from?

Select one:

- O a. Intermediate part of somite

- O b. Lateral mesoderm

- O c. Ventromedial part of somite

- O d. Intermediate mesoderm

- O e. Dorsolateral part of somite

Folding of the embryo begins at?

Select one:

- O a. The 14th day
- O b. The 7th day
- O c. The 17th day
- O d. The 5th day
- O e. The 21st day

The pancreatic gland is?

Select one:

- O a. Endoderm
- O b. Mesoderm
- O c. Ectoderm
- O d. Exoderm
- O e. Hypoderm

The amnioblast of the male is?

Select one:

O a. Endoderm

O b. Mesoderm

O c. Ectoderm

O d. Exoderm

O e. Hypoderm

All following results of lateral folding except?

Select one:

O a. The part of the gut is called midgut

o b. Formation of a single peritoneal cavity

o c. The intermediate mesoderm becomes caudal to the peritoneal cavity

- o d. The embryo becomes cylindrical in shape
- o e. The gut connecting to the dorsal wall of the embryo by dorsal mesentery

Formation of blastocyst?

Select one:

O a. The 15th day

O b. The 4th day

O c. The 7th day

O d. The 5th day

o e. The 14th day

The neural crest lies?

Select one:

- O a. Dorsal to neural tube
- O b. Ventral to neural tube
- O c. Lateral to neural tube
- O d. Dorsolateral to neural tube
- O e. Caudal to neural tube

Pectoralis major muscle is developed from?

Select one:

- O a. Intermediate part of somite
- O b. Lateral mesoderm
- O c. Ventromedial part of somite
- O d. Intermediate mesoderm
- O e. Dorsolateral part of somite

Urachal fistula, meaning?

Select one:

Oa. Persistence of the middle

part

o b. Obliteration of urachus

o c. Persistence of the distal end

o d. Persistent of the urachus

o e. persistence of the proximal

part

The Lower 1/2 of the anal canal is?

Select one:

O a. Endoderm

O b. Mesoderm

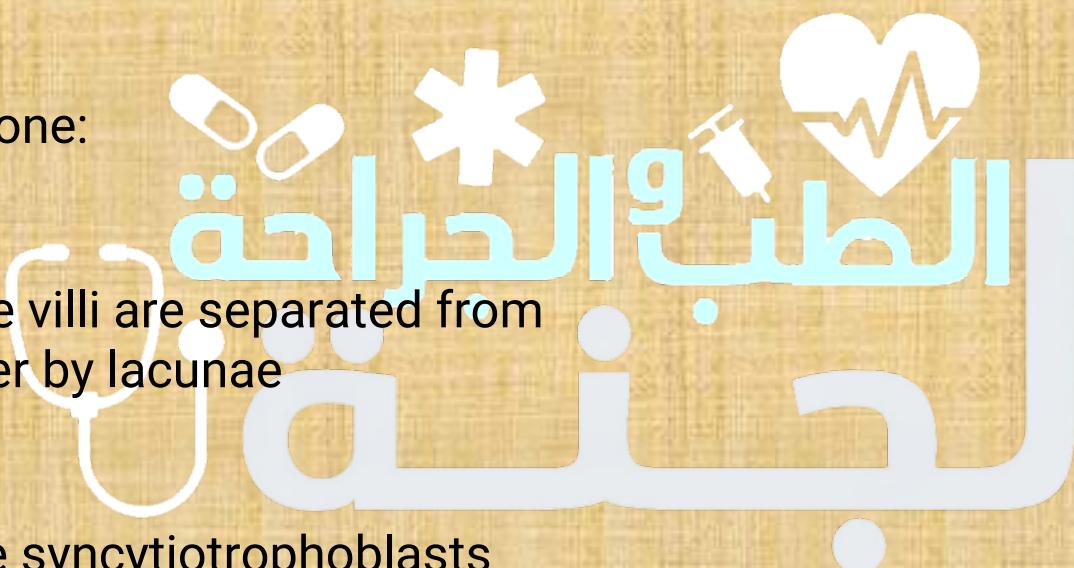

o c. Ectoderm

o d. Exoderm

o e. Hypoderm

All characters of Primary chorionic villi except?

Select one:

o a. The villi are separated from each other by lacunae

o b. The syncytiotrophoblasts form finger-like projections

o c. Lacunae appeared at embryonic pole of the disc

o d. Lacuna filled with maternal

blood due to erosion of the uterine vessels by syncytiotrophoblasts

O e. The cytотrophoblasts migrate into center of the lacuna

The right seminal vesicle is developed from?

Select one:

- O a. Intermediate part of somite
- O b. Lateral mesoderm
- O c. Ventromedial part of somite
- O d. Intermediate mesoderm
- O e. Dorsolateral part of somite

The first stage of development of notochord is?

Select one:

a. Notochordal canal

b. Definitive notochord

c. Neuroenteric canal

d. Primitive pit

e. Primitive notochord

All following results of folding except?

Select one:

O a. Vitellointestinal duct in the

umbilical ring

- b. The embryo becomes cylindrical in shape
- c. The point of meeting of the folds is the umbilical ring
- d. The embryo is surrounded by the amniotic cavity
- e. Part inside the embryo forming the definitive gut

Tongue is developed from?

Select one:

- a. Intermediate part of somite
- b. Lateral mesoderm
- c. Ventromedial part of somite
- d. Intermediate mesoderm
- e. Dorsolateral part of somite

The Eustachian tube is?

Select one:

O a. Endoderm

O b. Mesoderm

O c. Ectoderm

O d. Exoderm

O e. Hypoderm

Hansen's node is?

Select one:

O a. Endoderm

O b. Mesoderm

O c. Ectoderm

O d. Smooth muscle

O e. Mucus membrane

Chromosol analysis used to detect?

select one:

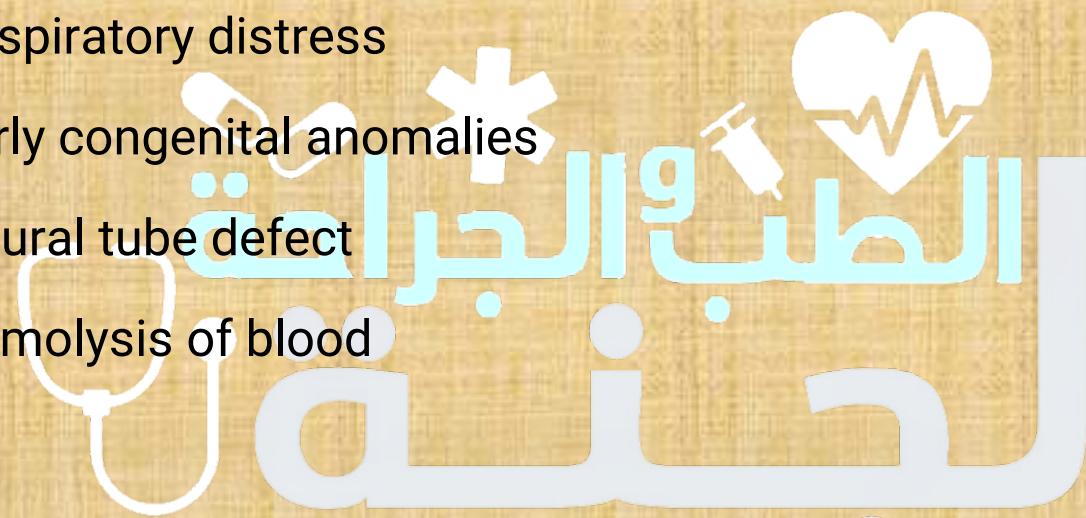

O a. Rh incompatibility

O b. Respiratory distress

O c. Early congenital anomalies

O d. Neural tube defect

O e. Hemolysis of blood

How many layers of placental barrier in the 8th month?

Select one:

O a. Two

O b. Three

O c. Four

O d. Five

O e. Six

Primitive streak is?

Select one:

O a. Endoderm

O b. Mesoderm

O c. Ectoderm

O d. Smooth muscle

O e. Mucus membrane

Closure of notochordal canal by?

Select one:

- O a. The cells of the medial of the notochordal canal
- O b. The cells of the roof of the notochordal canal
- O C. The cells of the lateral of the notochordal canal
- O d. The cells of the median of the notochordal canal
- o e. The cells of the floor of the notochordal canal

Choose the correct statement?

Select one:

- O a. Cloacal membrane is caudal to primitive streak
- o b. The embryo is pear shaped at the beginning of the 3rd week
- o c. Prechordal plate is cranial to primitive streak
- o d. Primitive streak is developed at the middle of the caudal half of embryo
- o e. Primitive streak is ectoderm

There is connection between amniotic cavity and yolk sac by?

Select one:

- O a. Notochordal canal
- O b. Definitive notochord
- O c. Neuroenteric canal
- O d. Primitive canal
- O e. Primitive notochord

The parietal layer of pleura is developed from?

Select one:

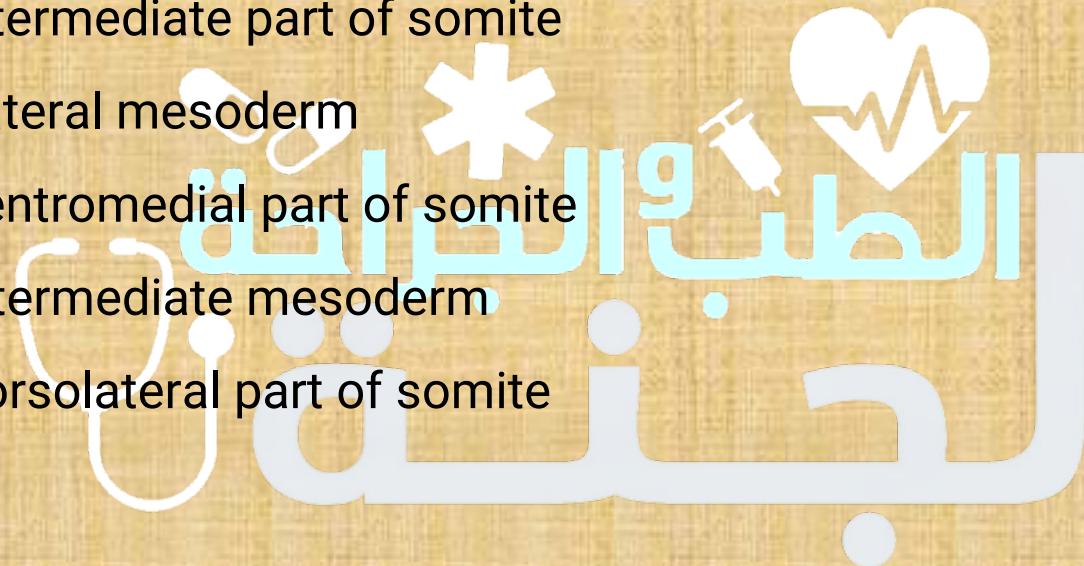

- O a. Intermediate part of somite
- o b. Lateral mesoderm
- o c. Ventromedial part of somite

- o d. Intermediate mesoderm
- o e. Dorsolateral part of somite

The epididymis is developed from?

Select one:

- O a. Intermediate part of somite
- O b. Lateral mesoderm
- O c. Ventromedial part of somite
- O d. Intermediate mesoderm
- O e. Dorsolateral part of somite

Primitive pit starts?

Select one:

- O a. Cranial
- O b. Deep

O c. Ventral

O d. Caudal

O e. Dorsal

The mucous membrane of the tongue is?

Select one:

O a. Endoderm

O b. Mesoderm

O c. Ectoderm

O d. Exoderm

O e. Hypoderm
