

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

# TERMINOLOGY (Midterm– 2021)

إعداد:

1- one of these means “around”:

- a) Circum
- b) Stomy
- c) Tomy
- d) **peri**

2- One of Alzheimer symptoms:

- a)
- b)
- c)
- d)
- e) **memory loss, apathy, and dementia.**

3- sudden, convulsions??

4- child born without brain?

- a)
- b)
- c)
- d)
- e) **anencephaly**

5-tumor in the surrounding of the spinal cord and the brain:

- a)
- b)
- c)
- d)
- e) **meningioma**

6-Which of the following describes a condition of excessive cerebrospinal fluid (CSF)in the brain:

a- Spina bifida

b- Reye syndrome.

c- **Hydrocephalus**

7- high CSF volume in brain ventricles Reye syndrome:

**\*\*Hydrocephalus**

Hydrocele

a)

b)

c)

d)

e) **Hypoglossal & Facial & Glossopharngal**

9- the drug that stop vomiting ( blocking nerve impulses):

**Antiemetic**

10- treating the constipation by increasing peristaltic activity

a)

b)

c)

d)

e) **Laxatives**

11- picture of the stomach and detect the lesser curvature .???

12- the esophagus:

- a)
- b)
- c)
- d)
- e) **Transfer food and water to the stomach**

13- stomach pain means:

- a)
- b)
- c)
- d)
- e) **gastralgia**

14- the first part of the small intestine:

- a) Jejunum
- b) Ileum
- c) Sigmoid colon
- d)
- e) **Duodenum**

15- intra means:

- a)
- b)
- c)
- d)
- e) **Within**

16- the gland that control the temperature, appetite:

- a)
- b)

c)

d)

e) \*\* hypothalamus??

17- hormone stimulate growth, hormone inhibit growth, respectively

a)

b)

c)

d)

e) GHRH, somatostatin

18- hormone control urine concentration:

a)

b)

c)

d)

e) ADH

19- gland that secrete its contents in duct:

a)

b)

c)

d)

e) Exocrine

20- true about the pancreas:

a)

b)

c)

d)

e) tumor in the pancreas with high insulin called is called insulinoma

21- part of the brain, responsible of movement and personality:

a)

b)

c)

d)

e) **frontal lobe**

22- plane that cut the body into two equal parts:

a)

b)

c)

d)

e) **Sagittal plane**

23- and/o:

a) Root word female

b) Root word male

c)

d)

e) **combining form means male**

24- benign tumor, high heart rate and weight loss:

a)

b)

c)

d)

e) **Thyrotoxicosis**

25- Suffix means surgical cutting

a) Tomy

b) Ectomy

c) **Stomy**

26-fatty cells found in:

a) **Connective tissue 'loose, adipose'**

b) Tissues line the blood vessel

c) Endothelium

27-System contain hair skin nail

a) **Integumentary system**

28-Farthest from origin

a) **Distal**

b)

c)

d)

e)

29-Ears ----- to the nose

a) **Lateral**

b)

c)

d)

e)

30-Plane divide the body into equal halves

a) **Sagittal**

b)

c)

d)

e)

31- \_\_\_\_\_ cavity is superior to the diaphragm

a) **Chest**

b)

c)

d)

e)

32- Combining form refer to the first part of the small intestine

a)

b)

c)

d)

e) **Duodon\o**

33- Instrument to examine the first part of the intestine

a)

b)

c)

d)

e) **Duodoscope**

34- Medication to treat constipation

a)

b)

c)

d)

e) **Laxative**

35- Medication to control vomiting

a)

b)

c)

d)

e) **Antiemetic**

36- The brain consists of cerebrum ,diencephalon , brain stem and

a)

b)

c)

d)

e) **Cerebellum**

37- Part of brain responsible for voluntary body movements and balance?

a)

b)

c)

d)

e) **Cerebellum**

38- Damage to the optic nerve cause

a)

b)

c)

d)

e) **Loss of vision**

39- Part of the brain responsible for control sleep, ANC ,GI

a)

b)

c)

d)

e) **Hypothulmus**

40- medication used during surgical procedure

a)

b)

c)

d)

e) **anesthesia**

41- accumulation of CSF within brain ventricles

a)

b)

c)

d)

e) **hydrocephalus**

42- Brain fails to form during fetal development, baby is usually stillborn or dies shortly after birth

a)

b)

c)

d)

e) **anencephaly**

43- removes part of vertebra; relieves pressure on spinal nerve

a)

b)

c)

d)

e) **laminectomy**

44- Two glands, one located above each kidney?

a)

b)

c)

d)

e)Adrenal

45- development of breast tissue in males?

a)

b)

c)

d)

e) gynecomastia

46- How do sex cells divide?

Meiosis

47-The tissue in which fat accumulates?

Adipose tissue.

48- The hand is to the arm?

Posterior

49- Which of the following is not described the anatomical position correctly?

head facing to the right.

50- gall stone in the salivary gland:

Hermon/disease correct

GI acromegaly

Thyroxin tetany

51- Plural for word end with us

a) l

b) isec

c) ar

d) es

52- Which is incorrect about anatomical posture

The head hang left to the side

Peristalsis?

53- hyposecretion in adult?

a) **Thyrotoxicosis**

b)

c)

d)

e)

54- Myxedema

a)

b)

c)

d)

e) **Hashimoto's disease.**

55- Graves' disease

Hypersecretion?

-Recklinghausen disease

Tetany

Panhypopituitarism

dwarfism

-master gland?

**Pituitary**

56- two diseases results from hyper-secretion:

a)

b)

c)

d)

e) Pheochromocytoma and Recklinghausen??

57- patient with polyuria, polydipsia and normal glucose concentration??

a)

b)

c)

d)

e) ?? Diabetes insipidus
