## Psychology 3

- \* memory goes through 3 stages:
- عدد تثبيت المعلومة للمرة الاولى → registration
- ② retention → الإحتفاظ بهذه المعلومات وترتيبها وتصنيفها
- universed in the street of t
- \*short memory: for few hours, days or week
- \*long memory: historical memories (date of birth), for years
- \*total amnesia → loss of both short and long memories
- \*bad emotional → very bad for People with hypermnesia

## Disorders of memory

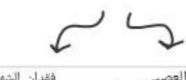

- ② amnesia disorienation → prominent with PPT (place, person, time)
- ③ retrograde amnesia → بنسى الشفلات التي حدثت قبل الحادث ( بتذكر الحادث نفسه فقط) : retro-antero grade ( retro-antero grade ) معدود الحادث ( بتذكر الحادث نفسه فقط)
- بىسى الشفلات التي حدثت بعد الحادث → anterograde
- ا يتذكر الأحداث قبل ما يشرب ولكن أثناء الشرب بكون غير مدرك → specific alcoholic amnesia
- ⑤ psudo reminiscence → block (filling in the gab)

\*\*\*

## Disorder of thinking

- Rigidity → circumstantality (give unnecessary and irrelevant details).
- ② sperrung → mute (speechless).
- ③ in dysmphobias → general appearance (body image) ⇒ smell weight

فقدان الشهية العصبي anorexia nervosa	الشرة العصبي bulimia nervosa	
low BMI	BMI within normal range	
ex:very thin, doesn't eat much. a though she is fat	ex : when they finish eating, they regret it	

delusion (false fixed believe)	obessive	over valued
*فكرة ثابتة خاطئة	* هو موجود	*موجود مع استخدام
*شيئ غير موجود ولكن هي بتسوسوس ان موحود	- repetitive for the same action	intervention ببالغ فيها - variety in actions
Ex: like girl who thinks that there is hair on her face	ex: there is actual hair on her face	There is actually hair on her face
even through it isn't exist and that she might turn into aman (for no reason)	en through it isn't exist that she might turn into	with exaggerated interventions
